

## Dip Coating

Model: DIP 2070

### Properties

- Metallic body
- Drier included
- Adjustable dipping depth 1-230 mm
- Adjustable speed 1-600 mm/min
- Independent speeds for go and back
- Adjustable dipping time
- Adjustable drying time
- Carrying 5 solutions smoothly
- Saving the latest settings
- Setting solution-offset

### Applications

- Physics labs
- Chemical labs
- Nano-physics labs
- Nano-electronics
- etc.

### More

*Dip Coating is a method to coat solutions, liquids, sol-gels, etc on various kinds of glass bases. The layer thickness could be varied by adjusting the speed and time of the coating operation.*

Address No.11, Innovation and Commercialization Center, University of Kashan, Iran.
